SMART-KILL™
Electronic Traps

USER GUIDE
Victor® Smart-Kill™ Electronic Mouse Trap Model: M1
Victor® Smart-Kill™ Electronic Rat Trap Model: M2
Contains FCC ID: 2ADHKATWINC1510
Module Manufacturer: ATMEL
Module Designation: ATWINC1510
THIS DEVICE COMPLIES WITH PART 15 OF THE FCC RULES. OPERATION IS SUBJECT TO THE FOLLOWING TWO CONDITIONS: (1) THIS DEVICE MAY NOT CAUSE HARMFUL INTERFERENCE, AND (2) THIS DEVICE MUST ACCEPT ANY INTERFERENCE RECEIVED, INCLUDING INTERFERENCE THAT MAY CAUSE UNDESIRED OPERATION.

Warning: Changes or modifications to this device not expressly approved by Woodstream Corporation could void the user’s authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection
against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
**WARNING:** Electric Shock and Spark Hazards  
**Ignition:** Use indoors **ONLY** on dry, clean surfaces. Do not use near unvented flammable vapors, liquids, or combustible solids. Do not use in barns, stables, or similar wet or dusty locations.  
**High Voltage:** Keep out of reach of children and pets. Use only dry hands or rubber gloves to handle. Power OFF and separate units before baiting. Do not touch metal plates when device is powered on.  
**Electromagnetic Waves:** Keep pacemakers and life support devices at least one foot away. Consult your heart doctor if you receive a shock. Failure to read and heed all warnings and directions may cause electric shock, fire, or serious injury. Read and follow all label instructions.
STATEMENT APPLIES ONLY TO EUROPEAN COUNTRIES. (CE): This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved.

Cleaning and user maintenance shall not be made by children without supervision.

Manufactured for:
Woodstream Corporation
69 N. Locust Street, Lititz, PA 17543
800-800-1819

Europe Phone: +44 (0) 1572 722558 or email enquiries@woodstream.com
You Will Need:

- A smart phone, tablet or similar connected mobile device.
- Broadband internet connection. **Do NOT** use a phone/tablet hot spot.
- A strong Wi-Fi signal where trap will be placed.
- Password for your home network.
- A Victor® Smart-Kill™ trap.
- A set of brand new batteries (4 "AA" for the mouse trap, 4 "C" for the rat trap).

Important Notes

- Once a rodent is caught, a notification is sent to your connected device if it is connected to the Victor® Pest App.
- A notification is sent to your mobile device when the battery life of the trap is low. Replace batteries when you receive this notification.
- You can share your experience through social media within the App.
- The trap will still operate without being connected to Wi-Fi. However, you will not receive notifications upon catching a rodent and will need to regularly check the trap.
- Visit: www.victorpest.com/electronics for customer support.

**Trouble Shooting:**

**STOP!** If you have questions or problems with your purchase do not return it to the retail store. Please contact us directly for immediate assistance at 1-855-5-VICTOR.

Europe Phone: +44 (0) 1572 722558.

You may need to check your Wi-Fi signal strength. Do this by making sure your mobile device is connected to your Wi-Fi network. Hold your mobile device in the place where your Victor® Smart-Kill™ trap will be stationed and check the Wi-Fi signal strength.
If you see:

WiFi signal is strong. You’re all set!

WiFi signal is weak. Your Victor® Smart-Kill™ trap will likely connect to your Wi-Fi network, but connection may be intermittent.

No WiFi signal:
Try one of the following:
- Move your router closer to your Victor® Smart-Kill™ trap.
- Buy a Wi-Fi range extender.

Indications that the trap did not successfully connect to Wi-Fi during setup:

- A network/server error has occurred if the blue Wi-Fi light and the red Victor® “V” light stay on for 5 seconds. Power the trap off and start over.
- A password error has occurred if the blue Wi-Fi light and the red Victor® “V” light blink for 5 seconds. Re-enter password. Note that passwords are case sensitive.
3. Scan Trap Code
Center the trap’s code in the window on the screen. The trap code is the QR code located on the bottom of the mouse trap and the back of the rat trap. See FAQ page for images of QR code locations.

4. Connect Mobile Device to Trap
Go to Wi-Fi settings on your device by pressing the red “GO TO SETTINGS” button. Select the trap, which is VICTOR followed by 15 alphanumeric digits. (Ex: VICTOR-WM170818BE00004). Press “Connect”, then press the back button.

If you have trouble successfully scanning the code, try changing the distance between the trap and mobile device. Alternatively you can enter the 15 digit alphanumeric code manually by pressing the “ENTER CODE MANUALLY” text found on the bottom of the screen. Enter the serial number found next to the QR code on your trap.

5. Connect Trap to Wi-Fi
Select the Wi-Fi network to connect the trap to. Enter the network password for the Wi-Fi network, then press the red “Connect” button. It may take up to 1 minute to connect.

6. Connected
A notification appears when the trap successfully connects. Press the red “Next” button and continue to step number 8.

7. Unable to Connect
If your trap did NOT successfully connect, go to the Settings menu of your mobile device, then select the Wi-Fi option. Select more options (often can be found by pressing the options button in the top right corner) then select “Saved Networks.” Find the trap name (Ex: VICTOR-WM170818BE00004) and select it. Select “FORGET.” Power trap off, then repeat steps 1 through 7. If the trap still does not connect, visit the Trouble Shooting section or call 1-855-5-VICTOR for immediate assistance.

Frequently Asked Questions

• Where should I place my trap?
Traps can be placed anywhere indoors. Place trap against a wall where rodent activity is frequently seen.

• Where is my trap/QR code?
The QR code is located on the bottom of the mouse trap and the back of the rat trap.

• What kind of bait should I use?
The best baits are high in fat and protein, such as peanut butter or hazelnut spread.

• How much bait do I need?
The trap has a bait cup that shows you exactly how much bait to use. Do not overfill the bait cup. Do not place bait on the metal plates. Doing so may interfere with the electrical functionality and your trap may not work unless you completely clean the bait off.

• How do I dispose of a caught mouse?
Press the power button to turn the unit “OFF”. Open the kill chamber door and properly discard rodent. Clean and bait trap after each use for most effective results. Press the power button to turn the unit back on. The trap will automatically reconnect to Wi-Fi. Opening and closing the kill chamber door will re-arm the mouse trap if it has not been powered “OFF.”
• **How much bait do I need?**
The trap has a bait cup that shows you exactly how much bait to use. Do not overfill the bait cup. Do not place bait on the metal plates. Doing so may interfere with the electrical functionality and your trap may not work unless you completely clean the bait off.

• **How do I dispose of a caught mouse?**
Press the power button to turn the unit “OFF”. Open the kill chamber door and properly discard rodent. Clean and bait trap after each use for most effective results. Press the power button to turn the unit back on. The trap will automatically reconnect to Wi-Fi. Opening and closing the kill chamber door will re-arm the mouse trap if it has not been powered “OFF”.

• **How do I dispose of a caught rat?**
Press the power button to turn the unit “OFF”. Properly discard rodent. Clean and bait trap after each use for most effective results. Press the power button to turn the unit back on. The trap will automatically reconnect to Wi-Fi.
• How do I dispose of a caught rat?
Press the power button to turn the unit “OFF.” Properly discard rodent. Clean and bait trap after each use for most effective results. Press power button to turn the unit back on. The trap will automatically reconnect to Wi-Fi.
1. Download the free Victor® Pest App from the Apple App Store® or Android Google Play™ store. Check that the unit is turned “OFF” by making sure the power button is not pressed down. Insert batteries into the battery compartment and launch the Victor® Pest App.

2. Connect your trap by following the instructions on screen. Step by step instructions are also in this guide.

3. Once the power button and Wi-Fi button have been pressed during the initial setup, users will have 5 minutes to successfully finish. Once 5 minutes have passed, the user should power the trap off and start over if setup was not successful.
3. Scan Trap Code
Center the trap’s code in the window on the screen. The trap code is the QR code located on the bottom of the mouse trap and the back of the rat trap. See FAQ page for images of QR code locations.

4. Connect Mobile Device to Trap
Go to Wi-Fi settings on your device by pressing the red “GO TO SETTINGS” button. Select the trap, which is VICTOR followed by 15 alphanumeric digits. (Ex: VICTOR-WM170818BE00004). Press “Connect”, then press the back button.

If you have trouble successfully scanning the code, try changing the distance between the trap and mobile device. Alternatively you can enter the 15 digit alphanumeric code manually by pressing the “ENTER CODE MANUALLY” text found on the bottom of the screen. Enter the serial number found next to the QR code on your trap.

5. Connect Trap to Wi-Fi
Select the Wi-Fi network to connect the trap to. Enter the network password for the Wi-Fi network, then press the red “Connect” button. It may take up to 1 minute to connect.

6. Connected
A notification appears when the trap successfully connects. Press the red “Next” button and continue to step number 8.

7. Unable to Connect
If your trap did NOT successfully connect, go to the Settings menu of your mobile device, then select the Wi-Fi option. Select more options (often can be found by pressing the options button in the top right corner) then select “Saved Networks.” Find the trap name (Ex: VICTOR-WM170818BE00004) and select it. Select “FORGET.” Power trap off, then repeat steps 1 through 7. If the trap still does not connect, visit the Trouble Shooting section or call 1-855-5-VICTOR for immediate assistance.

Android Devices
Important Note: Some screens, instructions and settings may differ slightly depending on what device you are using.

1. Press Power Button
Press the power button to turn the trap on. The Victor® “V” will blink green 3 times.

2. Press and Hold Wi-Fi Button for 5 Seconds
The Wi-Fi button will blink blue 10 times while the trap is connecting.

8. Name Your Trap
After successful connection, name the trap and press the red “Next” button.

9. Bait and Place Trap
Swipe through the three instruction screens on baiting and placing the trap, then press the red “Done button. Visit the Frequently Asked Questions section for more information on baiting and placing the trap.

10. Monitor Trap
Stay up to date on trap activity from anywhere via your mobile device.
3. **Scan Trap Code**
Center the trap’s code in the window on the screen. The trap code is the QR code located on the **bottom** of the mouse trap and the **back** of the rat trap. See FAQ page for images of QR code locations.

Getting Started: iOS Devices

1. Download the free Victor® Pest App from the Apple App Store® or Android Google Play™ store. Check that the unit is turned “OFF” by making sure the power button is not pressed down. Insert batteries into the battery compartment and launch the Victor® Pest App.

2. Connect your trap by following the instructions on screen. Step by step instructions are also in this guide.

3. Once the power button and Wi-Fi button have been pressed during the initial setup, users will have 5 minutes to successfully finish. Once 5 minutes have passed, the user should power the trap off and start over if setup was not successful.
iOS Devices

Important Note: Some screens, instructions and settings may differ slightly depending on what device you are using.

1. **Press Power Button**
   
   Press the power button to turn the trap on. The Victor® “V” will blink green 3 times.

2. **Press and Hold Wi-Fi Button for 5 Seconds**
   
   The Wi-Fi button will blink blue 10 times while the trap is connecting.

---

1. **Press Power Button**

   Press the power button to turn the trap on. The Victor® “V” will blink green.

2. **Press & Hold Wi-Fi Button for 5 Seconds**

   The Wi-Fi button will blink blue while the trap is connecting.
3. **Scan Trap Code**

Center the trap’s code in the window on the screen.

The trap code is the QR code located on the **bottom** of the mouse trap and the **back** of the rat trap. See FAQ page for images of QR code locations.
3. **Scan Trap Code (Continued)**

If you have trouble successfully scanning the code, try changing the distance between the trap and mobile device. Alternatively, you can enter the 15 digit alphanumeric code manually by pressing the “ENTER CODE MANUALLY” text found on the bottom of the screen. Enter the serial number found next to the QR code.
4. Connect Mobile Device to Trap

Go to Wi-Fi settings on your device by pressing the red “GO TO SETTINGS” button.

Select the trap, which is VICTOR followed by 15 alphanumeric digits. (Ex: VICTOR-WM170818BE00004). Press the back button on the device’s **top menu bar** to return to the **Victor® Pest App.**
5. **Connect Trap to Wi-Fi**
Press the red “Next” button to go to Wi-Fi settings.
Choose the Wi-Fi network you would like your trap to connect to.
5. Connect Trap to Wi-Fi (Continued)
Enter the network password for the Wi-Fi network, then press the red “Submit” button.
6. Reconnect Mobile Device to Wi-Fi

Go to the Wi-Fi settings on your device by pressing the red “Go to Settings” button. Choose a Wi-Fi network. Most devices will automatically re-connect to the most recently selected Wi-Fi network. If it does not, select it. Then press the back button on the phone’s top menu bar to return to the Victor® Pest App.

6. Reconnect Mobile Device to Wi-Fi

Go to the Wi-Fi settings on your device by pressing the red “Go to Settings” button. Choose a Wi-Fi network. Most devices will automatically re-connect to the most recently selected Wi-Fi network. If it does not, select it. Then press the back button on the phone’s top menu bar to return to the Victor® Pest App.
6. Reconnect Mobile Device to Wi-Fi (Continued)
Press the red “Next” button. It may take up to 1 minute to connect.
7. Connected
A notification appears when the trap successfully connects. Press the red “Next” button and continue to step number 9.

8. Connection Error
If your trap did NOT successfully connect, visit the Trouble Shooting section of this manual or click “Connection Help” on screen.
9. Name Your Trap
After successful connection, name the trap and press the red “NEXT” button.

10. Bait and Place Trap
Swipe through the three instruction screens on baiting and placing the trap, then press the red “Done” button. Visit the Frequently Asked Questions section for more information on baiting and placing the trap.
11. **Monitor Trap**

Stay up to date on trap activity from anywhere via your mobile device.
Mouse Trap Cleaning Instructions

1. Press the power button to turn the trap OFF, then remove the batteries. Hold the trap with the battery compartment in your left hand, buttons facing upwards and the rodent entrance facing towards you.

2. With your right hand push forward and separate the kill chamber from the electronics housing.

3. The kill chamber is now ready for cleaning. Open the rodent disposal door. Use a hydrogen peroxide topical solution (available at most drug stores) and an old toothbrush to clean the inside of the chamber. If needed, use a wire brush to

4. Thoroughly dry the interior and exterior of the kill chamber prior to trap reassembly.

5. To reassemble trap, hold the battery compartment in your left hand, buttons facing upwards. Hold the kill chamber in your right hand with the rodent entrance facing towards you. Align the key holes and insert keys into opposite openings while pulling your right hand backwards to reconnect the halves.

6. The trap is ready for use.
remove any corrosion, being careful not to be too vigorous. This could accidentally remove all of the protective zinc plating.

4. Thoroughly dry the interior and exterior of the kill chamber prior to trap reassembly.

5. To reassemble trap, hold the battery compartment in your left hand, buttons facing upwards. Hold the kill chamber in your right hand with the rodent entrance facing towards you. Align the key holes and insert keys into opposite openings while pulling your right hand backwards to reconnect the halves.

6. The trap is ready for use.
3. Scan Trap Code
Center the trap’s code in the window on the screen. The trap code is the QR code located on the bottom of the mouse trap and the back of the rat trap. See FAQ page for images of QR code locations.

4. Connect Mobile Device to Trap
Go to Wi-Fi settings on your device by pressing the red “GO TO SETTINGS” button. Select the trap, which is VICTOR followed by 15 alphanumeric digits. (Ex: VICTOR-WM170818BE00004). Press the back button on the device’s top menu bar to return to the Victor® Pest App.

5. Connect Trap to Wi-Fi
Press the red “Next” button to go to Wi-Fi settings. Choose the Wi-Fi network you would like your trap to connect to. Enter the network password for the Wi-Fi network, then press the red “Submit” button.

6. Reconnect Mobile Device to Wi-Fi
Go to the Wi-Fi settings on your device by pressing the red “Go to Settings” button. Choose a Wi-Fi network. Most devices will automatically re-connect to the most recently selected Wi-Fi network. If it does not, select it. Then press the back button on the phone’s top menu bar to return to the Victor® Pest App.

7. Connected
