

Catch & Hold Mice Trap

Instructions

1. Slide the top of the trap open.
2. Bait the trap using peanut butter or anything high in protein like chocolate or hazelnut spread in the bait trough provided in the inside of the trap. Be sure to use a Q-tip, toothpick or another tool to bait so your scent is not transferred onto the trap.
3. Place the trap where you have seen signs of rodent activity or along the wall where rodents primarily travel. The end of the trap with the entrance holes should be placed nearest the wall.
4. After one to four mice are caught, slide the top of the trap open to release the mouse. We recommend releasing the mouse or mice at least two miles from your home or business to discourage it from returning.
