

PestChaser® PRO

Instructions

1. Plug the PestChaser PRO into the lower socket of a 110V-AC wall outlet using the 6 foot cord provided. The ideal placement for the PestChaser PRO is in the corner of the room and close to the entrance of the room. We recommend using one PestChaser PRO per large size room. The PestChaser PRO is ideal for garages, basements and attics because it has 2X the output and coverage as the mini units.

2. The red LED light will illuminate showing the unit is functioning properly.
3. Clear all surrounding objects away from the PestChaser PRO. The ultrasound emitted from the PestChaser PRO does not travel through walls, furniture, cabinets, or any other object.
4. Then, just sit back, relax and forget. Reduction in rodent activity should occur within 6-10 days.
